Address: No. 299 Bayi Road, Wuchang District, Wuhan City, Hubei Province, China

EDUCATION

Wuhan University B.S.

School of Computer Science (Ranked 19th by US News)

Wuhan, China

September 2021- present

- **GPA:** 3.95/4.00
- **Core courses:** Advanced Mathematics, Linear Algebra, Optimality Method, Probability and Mathematical Statistics, Stochastic Processes, Machine Learning, Computer Vision, Intelligent Robots, Intelligent System Design and Implementation

PUBLICATION (*CORRESPONDING AUTHORS, †EQUAL CONTRIBUTION)

Multi-modal Auto-regressive Modeling via Visual Words

Preprint

- Tianshuo Peng[†], Zuchao Li^{†*}, Lefei Zhang, hai zhao, Ping Wang, Bo Du

A Novel Energy Based Model Mechanism for Multi-Modal Aspect-Based Sentiment Analysis

[AAAI2024]

- Tianshuo Peng[†], Zuchao Li^{†*}, Ping Wang, Lefei Zhang, and Hai Zhao

FSUIE: A Novel Fuzzy Span Mechanism for Universal Information Extraction

[ACL2023]

- Tianshuo Peng[†], Zuchao Li^{†*}, Lefei Zhang, Bo Du, Hai Zhao

RESEARCH EXPERIENCE

Unified Multi-modal Auto-regressive Modeling Framework

Sept. 2023 - present

Wuhan University, Sigma Lab

Advisor: Zuchao Li

- We perform multi-modal auto-regressive modeling with a unified objective over multi-modal large language models for the first time.
- Our proposed model achieves superior visual-language understanding performance compared to the 13B model on five VQA datasets and four Benchmark Toolkits, using only 7B parameters. It even demonstrates competitive performance against larger-scale models like 33B.
- The paper is currently in submission of ACL 2024 (**first author**)

Energy Based Model for Multi-Modal Aspect-Based Sentiment Analysis

Mar. 2023 - Aug. 2023

Wuhan University, Sigma Lab

Advisor: Zuchao Li

- We proposed a Dual-Query Mechanism using the prompt as both visual query and language query to extract prompt-aware visual information. Additionally, we introduce an Energy-based Pairwise Expert that predicts aspect or sentiment span based on pairwise stability.
- Experiments on three widely used benchmarks demonstrate that our method outperforms previous approaches and achieves a new state-of-the-art performance.
- AAAI 2024 poster presentation (**first author**)

Fuzzy Span Mechanism for Universal Information Extraction

Spet. 2022 - Feb. 2023

Wuhan University, Sigma Lab

Advisor: Zuchao Li

- We proposed the Fuzzy Span Loss to alleviate the span-based model's excessive reliance on precise annotations. Additionally, we introduced Fuzzy Span Attention to adjust the model's focus on semantic information within limited spans in information extraction tasks.
- Our proposed method gets SOTA or competitive performance on a series of main IE tasks.
- ACL 2023 poster presentation (**first author**)

PROJECT EXPERIENCE

Computer Vision & Deep Learning Integrated Project (Course Project)

June. 2023

- Perform image classification on the CIFAR-10 dataset using the classic LeNet model and further improve the model structure to enhance performance.
- Conduct medical image segmentation on the ISBI-2012 dataset using the Unet model and further enhance the model to improve performance.
- Fine-tune the pre-trained DeeplabV3 model on the PASCAL VOC 2012 dataset to achieve semantic segmentation.

Computer Vision Based Autonomous Driving Project(Course Project)

July. 2023

- Learn to use digital image processing techniques to identify and label lane lines in video frames.
- Learn to use digital image processing techniques to identify and label lane lines in video frames.
- Implement vehicle object detection using MobileNets for low computational cost.

SCHOLARSHIPS AND AWARDS

- **China National Scholarship** (Top 2% nationwide)

Oct. 2023

- **First-class Scholarship** (Top 5% schoolwide)

Oct. 2023

- **Merit Student** (Top 5% schoolwide)

Oct. 2023

- **Second-class Scholarship** (Top 10% schoolwide)

Oct. 2022

- **Merit Student** (Top 5% schoolwide)

Oct. 2022
